

# Aldelo Fingerprint Server

- Fast User Log In
- Simplify and enhance security
- Streamline business processes
- Address compliance concerns
- Reduce password management costs

## Fast Biometric Authentication

Aldelo Fingerprint Server is a great biometric authentication add-on for Aldelo For Restaurants Pro & Lite Editions. Our fingerprint security works with Digital Persona U.are.U family of scanners, enabling your staff to perform quick logons without any additional steps.

## No Lost Cards or Passwords to Worry About

Aldelo Fingerprint Server is fast, secured and fully integrated with our POS solutions. No longer will your staff need to remember long access codes, or worry about losing magnetic swipe cards.

## Total Security Control

Aldelo Fingerprint Server enables you to control exactly who has access to your system without any compromises. Concerns such as time card buddy punching, sharing of access codes between staff members and the chance of stolen manager access codes are completely eliminated with our fingerprint security.

## Technology Driven Peace of Mind

Our fingerprint security helps you prevent anyone the ability to impersonate one another. Your staff will enjoy the new way of fingerprint logon because it is fast and simple. You will also enjoy the fingerprint logon because of the security & peace of mind that this technology offers.

## One Test Drive and You Will Be Sold

If you are still dealing with access codes and magnetic swipe cards, then why not take to the next step and try our fingerprint security solution. Once you have given it a test drive, you would not want to go back!

# Advanced Fingerprint Server

## Unique Features Suited to Large Establishments

Aldelo Advanced Fingerprint Server is designed specifically for larger restaurants that need more scalability, performance and flexibility. The Aldelo Advanced Fingerprint Server offers all of the standard features that our Aldelo Fingerprint Server provides, but in addition, it also offers some unique features suited for larger establishments.

## Unmatched Reliability and Speed

Aldelo Advanced Fingerprint Server integrates with Neurotechnology's VeriFinger biometrics technology to deliver unmatched reliability and speed. Our advanced fingerprint server allows fingerprint enrollment time to be within 0.2 – 0.4 of a second, and the ability to match 30,000 fingerprints per second.

## Wide Array of Reader Support

In addition, Aldelo Advanced Fingerprint Server also has support for a wide array of fingerprint readers, please check our website for a list of compatible devices.

## Unmatched Scalability

Although Aldelo Advanced Fingerprint Server offers unmatched scalability, performance and flexibility, this solution is ideal only if you anticipate having more than 40 fingerprint users or have the need to support fingerprint readers from various manufacturers. For most restaurants, our standard Aldelo Fingerprint Server is still the tool of choice when enabling fingerprint security due to its ease of setup, lower cost and good performance.

## Significant Security Improvement

Whether you select Aldelo Advanced Fingerprint Server or our standard Aldelo Fingerprint Server, your staff will experience a significant improvement in logon security and performance.

## Aldelo Advanced Fingerprint Server Requirements

- For each fingerprint reader, A VeriFinger license with HASP Protection (USB Dongle) is required. (Other VeriFinger license unlock methods are not supported)
- Fingerprint reader must be compatible with VeriFinger biometrics compatibility list
- Proper fingerprint reader driver must be installed on each of the POS terminal containing the fingerprint reader.
- All POS terminals have access to the computer hosting the fingerprint database
